

TAAYE[®]
best seat in the house

2011/2012 CATALOG

The heartbeat of expression

The universal center of musicality

The rhythm of communication

Look deep within. Open yourself and free yourself to play. Become the person you're meant to be. Believe in yourself and your abilities. Can you see it? Can you feel it? Now, you are ready to create. But what tools will you choose?

Enter Taye.

Taye Drums was founded in 1975 with the sole purpose of crafting instruments that are an extension of your art and originality. Beginning as a company that supplied superior quality hardware and drums to many of the world's most famous brands, after several years it became evident that it was necessary to offer Taye innovations and design ideas to all drummers seeking practical solutions to seemingly complex issues that interfere with the ability to create and perform. Solutions such as the SideLatch Snare Release™, SlideTrack™ Tom Holder System, PocketHinge™ Bracket, Articulated Claw Hook System-that virtually eliminates the need to disassemble claw hooks and tension rods from bass drums when changing heads-and studded lug gaskets that remove any metal-to-wood contact allowing the drum to resonate more freely.

Complete attention to detail and playability is incorporated into every Taye drumset, from student level to ultra-professional. What's more, unlike many other instruments, every component is entirely made by Taye.

This gives you the assurance of incomparable quality control and serviceability of every instrument and accessory we create.

So what are you waiting for?

Your only limitation is your imagination – your future lies beyond.

Taye Drums . . . best seat in the house.

TAYE[®]
DRUMS

best seat in the house

Play

It all starts with the shell.

No matter which series of Taye drums you choose, you receive the benefit of expert craftsmanship coupled with over 35 years of shell design experience. Taye's patented EFS™ shell technology, short for "Engineered for Sound", utilizes cross-lamination in the shell formation process.

Cross-lamination is the method of perpendicularly alternating the direction of the wood grain within the plies, providing drums with extremely rigid shells, resulting in breathtakingly broad tuning ranges. Taye's unique bearing edge system optimizes the tonal response to the frequency range of each individual drum.

100% Sugar Maple: Known for its unique sonic properties, provides equal amounts of lows, mids and highs. Sugar Maple is one of the hardest and densest species of the wood, accentuating these attributes.

100% Premium Birch: The wood of choice for achieving accentuated highs and lows with reduced mids, producing timbre with striking clarity and punch.

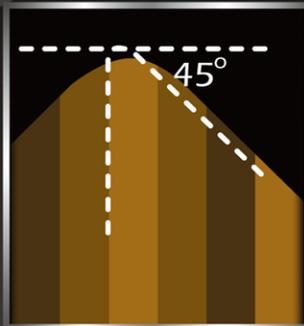

Birch/Basswood: Delivers the brights of birch, and due to the inherent properties of basswood, the lows associated with mahogany.

100% Poplar: Produces tonal properties similar to birch; bright attack with warm decay.

Whether you choose 100% North American Sugar Maple, 100% Premium Birch, Birch/Basswood or 100% Poplar, with Taye, you always achieve unsurpassed performance and response from your instrument.

EFS™ Shell Technology: Engineered For Sound. Among other innovations, Taye EFS™ utilizes cross-lamination in the shell formation process. Cross-lamination is the method of perpendicularly alternating the direction of the wood grain within the plies, providing drums with extremely rigid shells, resulting in breathtakingly broad tuning ranges.

SideLatch™ Snare Release: Simply designed for optimum performance, this side-action release system employs a minimum of moving parts. With a large knurled tension knob for easy snare adjustment, and our unique SlipLock feature that prevents unwanted loosening of snare tension, SideLatch™ is strong, smooth, and flawlessly reliable.

SlideTrack™ Tom Holder System: This patented feature allows near infinite adjustment of lateral placement for mounted toms, enabling the player to position drums to best suit any needs.

SuspensionRings™: An industry standard, SuspensionRings™ allow mounted toms to float freely, providing optimum tone and resonance.

PocketHinge™ Bracket: Another Taye innovation. With no internal pressure points, PocketHinge™ effectively distributes force across a wide area of the rod to which it mounts, delivering dependable, slip-free performance.

Articulated Claw Hook: Virtually eliminates the need to disassemble claw hooks and tension rods from bass drums when changing heads. The Articulated Claw Hook is designed to isolate the claw from the wood hoop, preventing unwanted tonal interference in live or studio applications.

Studded Gaskets: Patented studded lug gaskets remove any metal-to-wood contact allowing the drum to resonate more freely, delivering optimum sonic performance in all environments.

SpringFlex Bass Drum Spurs: Taye's unique SP90 bass drum spurs not only improve bass drum resonance, the sleek design enables the player to easily position stands in and around the bass drum. Retractable spikes eliminate bass drum movement.

Modular TC91/92 Tom Clamps: All configurations are equipped with either TC91 or TC92 tom clamps. Clamps are modular in design, will accept a wide range of tube diameters, and can be converted to single or double format.

Configuration-Friendly™: With the simplicity of standard configurations, the wide variety of component drums and ACS accessories, Taye makes creating your personal instrument seemingly limitless in possibilities.

STUDIOMAPLE

100% Hand-Selected North American Sugar Maple

Taye StudioMaple represents the definitive product of years of percussion craftsmanship and experience. Start with hand selected North American Sugar Maple. Maple has long been known for its unique sonic properties, providing equal frequency response of lows, mids and highs. Sugar Maple is one of the hardest and densest species of the wood, accentuating these attributes. StudioMaple shells are designed in varying thicknesses to highlight the inherent tone of this wood; high toms are crafted to produce great attack, while larger toms and bass drums have been engineered to emphasize the lower fundamentals. The result is a drum that will deliver a warm sound with sharp attack and warm decay that is perfect for any musical performance application.

STUDIOBIRCH

100% Hand –Selected Birch Shells

Imagine attack, presence and control in an instrument that is universally musical and incredibly extraordinary in appearance.

Birch is revered by drummers seeking to cut through the mix; it is the wood of choice for achieving accentuated highs and lows with reduced mids, producing timbre with striking clarity and punch.

StudioBirch drums are constructed from hand selected birch plies, and have been painstakingly engineered utilizing Taye's exclusive EFS™ shells technology to provide the optimum resonance and tonality.

Want to be noticed? StudioBirch is for you.

NATURAL TO BLACK BURST

GOKIT

Birch/Basswood Shells

Drums designed to provide full-size sound in limited space. Drums designed for small studio needs. Drums designed for drummers on the run.

GoKit was conceived with the musician in mind.

GoKit shells are constructed from both birch and basswood giving you the brights of birch, and due to the inherent properties of basswood, the lows associated with mahogany.

Don't let the sizes fool you.

A shallow drum does not reduce the tonal response of the instrument- it results in a fat yet controllable sound, making it an ideal solution for smaller venues.

On the run? Recording? Practicing? Taking lessons?

GoKit.

GoKit 14"x7" Rack Tom

Now you can expand your GoKit into the lower-frequencies with our new 14"x7" GoRack toms! With the same high-quality EFS™ birch-basswood shell, the 14"x7" retains the tonality of our widely popularized GoKit, but adds some of that low bottom end that many GoKit owners favor. More over, the 14"x7" is equipped with our patented Studded Gaskets, SuspensionRings™, PocketHinge Bracket™, TC91 Tom Clamp, and more!

PROX

Birch / Basswood Shells

High-end features, high-end finishes, but without the high-end price, ProX was designed with the player in mind.

ProX shells are constructed of birch and basswood producing a tonal quality that incorporates the brights of birch, and due to the inherent properties of basswood, the lows associated with mahogany, making it extraordinarily adaptable to any musical genre.

And, ProX is packed with many patented innovations that have made Taye a leader in sound and functionality.

Searching for a kit that provides anything and everything you need at an affordable price? Your search ends with ProX.

RockPro

100% Select Poplar Shells

This is the drum set that starts it all, combining professional level features with student level pricing. Simply stated, there is no drum set in the world that equals RockPro in sound or value.

100% Select Poplar shells produce tonal properties similar to birch; bright attack with warm decay. The result is bass drums that can hold down the low end, remarkably musical toms, and tight, crisp snare drums. And, as with all Taye drums, RockPro contains many of the patented features that are offered on our most expensive sets.

With a wide variety of colors, popular set configurations, available add-on toms, and tonal characteristics that cater to any playing style, RockPro is the ideal choice for drummers seeking a high-quality yet affordable kit.

SPOTLIGHT

100% Poplar Shells

Drawing on years of experience and expertise, Taye Spotlight redefines the meaning of entry-level.

Superior sounding shells finished in tough, great looking laminates, Spotlight drums feature 100% Select Poplar shells. Poplar produces tonal properties similar to birch; bright attack with warm decay.

Spotlight is an ideal first kit, yet still has professional features, and is offered in two kit configurations that can be expanded with RockPro components that will match up right down to the finishes. So unlike many other sets in this category, Spotlight can grow with your musical needs.

Spotlight Special Edition is a scaled down version, perfect for small rehearsal/practice spaces or small venues, and is the perfect choice for the drummer that can benefit from the ease of a truly portable and affordable kit.

Taye Snare Drums

All Taye wood snare drums from StudioMaple to Spotlight are available as separate components in several of sizes. Each drum has its own character and tonality, and ideal for use as primary or auxiliary snares.

Taye Specialty Snare Drums

10 – Ply Sugar Maple Shell

FFS™ shell technology applied to a 7.5mm Sugar Maple shell results in a drum that provides ultimate attack, unparalleled edge response, and a dry, resonant decay. Wood hoop models feature 14-ply Sugar Maple hoops and Taye's patented Articulated Claw Hooks producing an ideal go-to snare for any musical situation.

Aluminum Alloy Shell

Engineered from 6mm precision machined aluminum alloys- designed to provide optimum cut, articulation and warmth. Cold-Hammered construction adds to the depth and body of these instruments, delivering complex and versatile tonal ranges that will perform in a myriad of artistic applications. All Taye Specialty Aluminum Snare Drums are fitted with 14-ply Sugar Maple hoops and Taye's patented Articulated Claw Hooks.

Stainless Steel and Brass Snare Drums

Taye offers a full complement of Stainless Steel and Brass snare drums.

Taye Stainless Steel snare drums are bright and articulate with great edge response.

Taye Brass snare drums retain many of the same properties as stainless steel, but provide a darker, more focused tone. Both are available in a variety of sizes that suit any musical application.

Taye Stainless Steel and Wood Timbales

Taye produces both stainless steel and wood drum set timbales that add great flavor and accents to all styles of music. Stainless steel timbales come in four diameters ranging from 10" to 14"; wood timbales come in 10" and 12" diameters.

Taye MetalWorks – The Ultimate Kick Pedal

Ever feel like your pedal just isn't responding to you?
Ever feel like you're adjusting to the pedal rather than the pedal adjusting to you?

Taye MetalWorks™ resolves.

From its patented adjustable cam, to the length and feel of the footboard, MetalWorks creates a seamless bond between you and the bass drum. The double version is even easily convertible to a lefty without having to buy expensive additional parts. MetalWorks eliminates concentrating on your equipment, allowing you to concentrate on your art.

Taye MetalWorks™... your only limitation is your imagination.

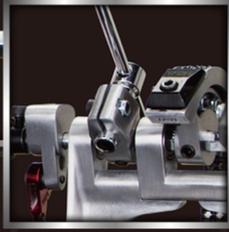

- ★ Stick Caddy

TMW-D

PSK501C

The PSK501C features a pro pedal, but at an entry level price point. You get the same spring assembly and double chain stability as our 600 series pedal but in a pedal that fits your budget.

- Spring Tension Adjustment
- Dual Chain Drive
- Beater Height and Position Adjustment

PPK401C and PPK401CP

With a budget pedal, you shouldn't have to sacrifice power, sensitivity, and smooth response. The PPK401C and PPK401CP are designed to provide the next level of performance at an entry level price point.

- Spring Tension Adjustment
- Beater Height Adjustment
- Single Chain Drive
- Stabilization Plate (PPK401CP)

PSK701C

PSK601C

Bass Drum Pedals

PPK401CP

PPK401C

PSK501C

PSK701C and PSK702C:

The PSK701C single and PSK702C double feature our roller bearing spring assemblies which give these pedals their silky smooth response.

Additional features include multiple adjustments such as spring tension adjustment, beater angle adjustment, beater height adjustment, beater position adjustment, and base plate length adjustment to adjust the angle of the chain (double only).

The PSK701C and 702C are smooth, powerful, and reliable pedals.

- Durable Texture Coated Frame
- Roller Bearing Spring Assembly
- Spring Tension Adjustment
- Beater Height and Position Adjustment
- Beater Angle Adjustment
- Double Chain Drive
- Adjustable Base Plates (Double only)

PSK601C and PSK602C

The PSK601C single and PSK602C double are designed to achieve a level of smoothness and provide you with smooth response, sensitivity, and power.

What's more is that these pedals feature spring tension adjustment, beater angle adjustment, beater height adjustment, beater position adjustment, and base plate length adjustment to adjust the angle of the chain (double only).

- Spring Tension Adjustment
- Double Chain Drive
- Beater Height and Position Adjustment
- Beater Head Angle Adjustment

6000 Series Hardware

Constructed of high quality materials, heavy gauge tubing and double-braced tripods, 6000 series hardware is built to stand up to the rigors of a gigging musician.

Incorporated in the 6000 series are Taye's innovative BallTilter and PinlessHinge.

Taye 6000 Hardware provides the ultimate in solid performance and reliability.

- ✦ **BallTilter:** Allows you to angle a cymbal or drum in any direction with one simple adjustment.
- ✦ **PinlessHinge:** Strong, reliable, smooth, with a minimum of moving parts, this Taye innovation eliminates the possibility of thread stripping at the hinge, a common problem with other designs

Taye Thrones

Taye offers the interchangeable options of four throne bases and six seat styles- traditional round tops to padded, ergonomic bicycle style seats.

Some drummers prefer the smoothness of vinyl; others the comfort of mesh covering. Regardless of style, all Taye thrones have been created utilizing proprietary stitching patterns, optimal foam content for superior spinal support, and shapes that enable ultimate ease of movement.
